

Description	Evaluation	Likelihood	Impact Level	Responsibility	Response	Control Measures
Computer dies	My computer dies, data is unrecoverable and hardware becomes unusable	low	high	me	recreate working environment on another machine, contact tutors if this would severely delay whole project	back up all code to github, use cloud-based apps for key documentation i.e. this assessment, UML diagrams, clearly document dependencies so that I could recreate working environment with minimal effort
Illness or injury of developer	I get ill or injured to such an extent I cannot complete my project	medium	extreme	me	reassess ability to meet mvp, if not possible then contact tutors	Practice social distancing and mask wearing when I leave the house this week.
Internet failure	My house internet goes down	low	medium	me, my dad (looks after wifi hardware)	If no wifi is available, purchase hardware for ethernet connection. If temporary issue use wifi hotspot from my phone. If no connection is possible or issue is longer term go to local pub and use their wifi.	Update git frequently. Be aware of wifi hotspot set up and local businesses where I could use wifi.
GitHub goes down	Catastrophic GitHub server fail	low	medium	GitHub	Move code to another version control site, like gitlab, bitbucket etc.	Be aware of GitHub alternatives. Regularly save my work.
A lockdown	The government declares another COVID-19 related lockdown	low	low	The British government	Abide by lockdown rules. Minimise going outside.	Ensure I have a reasonable amount of food and other essentials stocked up.
